NEAREST HIGH-VOLTAGE INFRASTRUCTURE

#	DISTANCE	VOLTAGE	LINES	NAME	FACILITY TYPE
1	0.47 mi	not recorded	2	unnamed in source data * AUBURN HILLS, MI	unidentified terminal facility
2	1.35 mi	120 kV	3	line tap point * AUBURN HILLS, MI	line tap point
3	1.36 mi	120 kV	3	line tap point * AUBURN HILLS, MI	line tap point
4	1.40 mi	120 kV	2	unnamed in source data * AUBURN HILLS, MI	unidentified terminal facility
5	1.62 mi	120 kV	3	unnamed in source data * LAKE ORION, MI	unidentified substation

n/r = not recorded in source data · search radius 10 miles

- 1 unnamed record · 0.47 mi · kV n/r
- 3 unnamed record · 1.36 mi · 120 kV
- 5 unnamed record · 1.62 mi · 120 kV

- 2 unnamed record · 1.35 mi · 120 kV
- 4 unnamed record · 1.40 mi · 120 kV

Aerial imagery: USDA NAIP imagery via USGS The National Map — Public domain (USDA/USGS), retrieved 2026-09-27. Marker positions are the source dataset's own coordinates; where records coincide, markers are separated slightly so each stays visible. Distances in the key are measured, not scaled off this drawing. Not a survey.

*** Not necessarily an interconnection point.**

- **unidentified terminal facility** — Unnamed in the source data with 2 transmission line connections. Radial topology of this kind is consistent with a customer-owned on-site substation, a private industrial service, or a small distribution tap. Ownership is not recorded in HIFLD; verify before treating this as a utility asset.
- **line tap point** — Named TAP<id> in the source data — a junction on a transmission line rather than a load-serving substation. Not normally an interconnection point.
- **unidentified substation** — Unnamed in the source data — roughly 49% of HIFLD substation records carry a placeholder name. Ownership and operator are unknown. Note that a higher line count does not establish utility ownership: operators who build for reliability often give an on-site substation source and path diversity from two or more utility substations.

- Distances are straight-line (haversine), **not** engineering route length.
- HIFLD does not record substation ownership. Proximity does not imply availability — a nearby facility may be a customer-owned on-site substation serving an adjacent property.
- 1 of 5 substations listed have no voltage recorded in the source dataset. Absence of a voltage is not evidence of low voltage.
- 5 of 5 carry a placeholder name in the source dataset.

LOCAL MORATORIA

None recorded for these jurisdictions

Census places this point in Oakland County · Auburn Hills city. This dataset tracks moratoria only — not project proposals, planning-commission reviews, or permanent zoning rules — so active local debate over a specific project will not appear here.

25 other instruments recorded within 25 miles (24 active or extended), measured to jurisdiction centroids.

Recorded is not the same as applicable, and the dataset is a lower bound: an absence here is not evidence that no moratorium exists. Detail and scope caveats: Appendix B.

4 DATA COMPLETENESS

5 of 6 expected fields resolved

Resolved: location, franchiseUtility, nearestSubstation, watershed, floodZone

Missing / unresolved

- **substationVoltage** — nearest substation has no voltage recorded in HIFLD (~23% of records lack it)

3 of 5 nearby substations are unnamed in the source data.

5 WHAT THIS REPORT DOES NOT TELL YOU

- Available load capacity at any substation. No utility publishes this for large loads; this report is a screening aid, not a system impact study.
- Interconnection cost or timeline for a specific project.
- Zoning approval likelihood.
- Interconnection queue data is appended to the bottom of this report when a substation listed above is an exact name and county match against the queue dataset. Visit the [Queue Wire](#) for further research.
- Whether a local moratorium covers this site. Instruments recorded for the jurisdictions containing the point are listed in Appendix B, but their scope is set by their own text, which this report does not read.
- Transmission line proximity — substations only.
- Whether a substation is physically accessible, expandable, or has available bay positions.

This report is built to **rule out sites with no nearby transmission infrastructure**. A site with nothing in range is a defensible elimination. The reverse does not hold: proximity to the facilities listed above is not access to power, and nothing here establishes that a connection is available, affordable or achievable on any schedule.

JURISDICTIONS

US Census Bureau Geocoding Services — geographies by coordinates

<https://geocoding.geo.census.gov/geocoder/geographies/coordinates>

Retrieved 2026-10-04 · Public domain (US Government work)

Screening aid, not an engineering study. This report helps prioritize sites before committing to engineering due diligence. It is not a system impact study and carries no warranty. Underlying public datasets are published on their own schedules and may have changed since the retrieval dates shown above. Every figure in this report is reproducible from the cited sources; nothing is estimated, modelled, or generated.

B APPENDIX — LOCAL MORATORIA

Local moratorium instruments — temporary pauses on accepting or approving certain development, most often data centers — as recorded in a third-party research dataset. Rows are reproduced as published; this report does not read the instruments themselves. This dataset tracks moratoria only — not project proposals, planning-commission reviews, or permanent zoning rules — so active local debate over a specific project will not appear here.

A recorded instrument is not a determination that this site is covered. Which applications, zoning districts and sectors an instrument reaches — and whether a county instrument applies inside incorporated municipalities — is set by its text. Confirm with the jurisdiction before relying on any row.

Jurisdictions containing this point

The dataset records no instrument for **Oakland County, Auburn Hills city**. That is a statement about moratoria only: a proposal under review or a planning-commission decision in these jurisdictions would not appear in it.

The publisher states its counts are lower bounds — small townships that do not post minutes online are the known gap — and that anything after 2026-09-23 is not included.

Within 25 miles

JURISDICTION	TYPE	STATUS	SECTORS	ADOPTED	ENDS	CENTROID
Orion Township, MI	Township	active	data centers	2026-06-15	<i>n/r</i>	3.4 mi
Pontiac, MI	City	extended	data centers	2026-01-21	2027-01-20	4.7 mi
Waterford Township, MI	Township	active	data centers	2026-03-23	2026-10-01	5.5 mi
Independence Township, MI	Township	active	data centers	2026-07-21	<i>n/r</i>	5.7 mi
Rochester Hills, MI	City	extended	data centers	2026-03-09	2027-03-04	8.0 mi
Oxford Township, MI	Township	active	data centers	2026-02-11	<i>n/r</i>	9.2 mi
White Lake Township, MI	Township	extended	data centers	2026-02-17	2027-02-12	10.1 mi
Brandon Township, MI	Township	extended	data centers	2026-05-04	2027-04-29	10.3 mi
Washington Township (Macomb County), MI	Township	active	data centers	2026-05-20	<i>n/r</i>	13.4 mi
Groveland Township, MI	Township	active	data centers	2026-02-09	<i>n/r</i>	13.9 mi
Utica, MI	City	extended	data centers	2026-01	<i>n/r</i>	14.3 mi
Village of Romeo, MI	Village	active	data centers	2026-01-26	<i>n/r</i>	15.7 mi

Distance is to the jurisdiction's centroid, not its boundary — a large county can begin much closer than the figure shown. 13 further instruments within 25 miles not shown (12-row limit).

State-level actions — MI

ACTION	STATUS	MECHANISM	PROVISIONS AS RECORDED
2024 PA 181	enacted	incentive restriction	Created or expanded qualified and enterprise data center use-tax exemptions through 2050 if conditions are met.
HB 4906 (2023)	enacted	incentive restriction	Expanded sales-tax exemption framework for enterprise data centers.

14 state-policy actions tracked for MI in total; only those the publisher records as enacted or in force are listed. Where the publisher's legal-effect field reads "unknown", the current effect of an enacted measure has not been checked by the publisher, and it is omitted here rather than guessed. 145 local instruments recorded statewide.

- Each instrument is tied to a Census county, county subdivision or incorporated place only when the Census places the publisher's own centroid inside a geography of the same name and kind. 70 of 1,291 rows could not be tied this way and do not appear in this appendix.
- The publisher compiles the dataset from municipal records and news coverage with AI-assisted research and documents its known gaps in the repository.
